

## **PRESS RELEASE**

**June 2010**

### **Quinton Hazell – Commitment to Development**

Every hour of every working day during every month, the technical specialists at Quinton Hazell are committed to bringing you the latest developments in the Automotive Aftermarket.

During the last 4 weeks we have issued over 40 new parts which are now available – stocked, priced and ready to order – ranging from Clutch Kits to Ignition Coils.

The team of dedicated specialists work hard to ensure all products match or exceed their OE equivalents – which is why they are the real alternative to the [generally] more costly vehicle manufacturers ‘Genuine’ parts. Indeed, many of the parts on offer from Quinton Hazell are designed and manufactured by the same team of people, in the same facilities, on the same machines and with the same materials as the OE versions!

QH have recently released 15 3-in-1 Clutch Kits for vehicles such as VW Polo to a Nissan Pathfinder – and all of these kits qualify on the QH Assure Lifetime Guarantee Scheme! There are an additional 8 2-in-1 Clutch Kits for the ever popular Fiesta right up to the Jag X-Type too! Braking brings 5 single brake discs for Renault applications (sold as singles due to the fact the bearing is already in them), stabiliser links, gas springs and subframe bushes complete the steering offer and an elastic drive belt for the BMW X5 brings the total to over 40.

Customers can receive these new to range parts direct to their email – and now QH are offering flyers to their customers – personalised – so the parts can be promoted onto garage customers too!

If you are an existing QH or Klarius customer who would like to be included on the email news group, please speak to your local Klarius QH Business Development Manager in the first instance.

- ENDS -

*Quinton Hazell Automotive Limited has over 60 years experience in design, manufacture, production and delivery of OE quality replacement parts for the Automotive Aftermarket throughout the world. 8 product divisions cover Rotating Electrics, Commercial Ignition, Steering and Suspension, Brakes, Cooling, Transmission, Filters and Security with over 26,000 part numbers currently in range. See [www.qh.com](http://www.qh.com) for more information on Quinton Hazell.*

*Formed in 2007, Klarius operates three manufacturing production facilities and a research and development Centre dedicated to the Emission Control Technology located in the UK. Added to that are European warehousing and four strong independent distribution platforms: in the UK, France, Germany and Spain. The Klarius technical centre has its own approved test track (the only parts manufacturer to have one) for undertaking type approval of parts. See [www.klarius.eu](http://www.klarius.eu) for more information on Klarius.*

***Klarius Group has over 1 400 employees across Europe. The Group offers 100 000 references to the aftermarket business. Klarius Group delivers 40 000 parts to over 136 countries everyday.***
